Received and published: 26 February 2014

Line 22, Page 6 and Lin 13, Page 7, “on the ship” could be “on board”.

Line 10, Page 9, “twice times of the” should be “twice of the”.

Lines 7-8, Page 10, please check “A longer NPF event was observed from 10:30 on Day 2 to 03:50 LT on 18 October 2011 (Day 3)”, it looks like the second NPF event was from 10:30 to 11:40 (check your exact time) on Day 2 (Fig. 3a and b), the bottleneck of about 30 nm at 11:40 on Day 2. If so, the consequent growth rate and discussion should be changed.
