Interactive comment on "A physically-based framework for modelling the organic fractionation of sea spray aerosol from bubble film Langmuir equilibria" by S. M. Burrows et al.

Anonymous Referee #3

Received and published: 15 July 2014

I am overall pleased with this paper. But, given its potential significance, it requires some additional effort. The changes required may be considered technically "minor", but my decision to indicate that it required "major revisions" reflects my sense & hope that the authors are willing to really digest the content of my review.

The review text is provided as an attachment.
