November 24, 2015

Dear Dr. Andreas Petzold,

Thank you for all of your effort towards the publication of our manuscript titled “Contributions of dust and biomass-burning to aerosols at a Colorado mountain-top site”. We also appreciate the feedback from the reviewers. This feedback has both improved and enhanced this paper.

We have completed the following technical corrections to the figures:

For Figure 1, we changed y-axis title to V_0 , as the parameter is referred to in the text.

For Figure 3 and Figure 4, we increased the font size of the axis labels and eliminated the gap between the figure panels.

Thank you for your service to Atmospheric Chemistry and Physics.

Best Regards,

Gannet Hallar
