

## Reply to Reviewer's Comments

We would like to thank the editor and one anonymous reviewer for their comments to help improve our manuscript. Below we give a response to address the comments. The original comment is in red and our response is in black.

### **Comments from Anonymous Referee #2**

#### ***General Comments:***

I accept the responses from the authors. I have one comment on the figures in the manuscript and supplemental material. They are not vector figures. They are blurry when zooming in. Please consider making high quality figures.

**Response:** We thank the reviewer for the suggestion. We have made major revisions for the figures in the manuscript and supplementary material as suggested by the referee, and details are described in the revised manuscript and supplementary material.
