

Editors comments on acp-2015-731:

***Carbon Monoxide Climatology derived from the Trajectory Mapping of Global MOZAIC-IAGOS Data, by M. Osman, D. W. Tarasick, J. Liu, O. Moeini, V. Thouret, V.E. Fioletov, M. Parrington, and P. Nédélec***

A few remaining technical points I have noticed:

p 1, l 24: if you introduce a “first” there should also be a “second”

p1 l 31: the data were “compared” but you should also state the result of the comparison

Throughout the paper: do not use italics for chemical formulas (`\chem` would work in LaTeX)

Check the references, I noticed a few issues:

You have  $106\pm 108$  (?) as the volume in Crutzen, P. (1973), 106 is correct. Add the doi: 10.1007/BF00881092 and change “Crutzen, P. A.” to “Crutzen, P.”

change “Nédelec” to “Nédélec, P.”

change: “Günther” to “Günther”

change: “Müller” to “Müller”
