The authors thank F.J. Alcalá for his valuable comment on the paper. If requested, we could provide a summary table in the appendix section, which would include the aerosol concentration in rain and OP water, as well as the precipitation volume for the evaluated meteorological stations. A large set of precipitation chemistry data is already available at the following website: <http://www.tropicalmountainforest.org>. The full data set on the chemistry of rainfall samples from this study will be made available in the website above before the manuscript's publication, and cited in the text whether by a
