Dear Mr. Pettini, you submitted two comments which are obviously not very clear. Please make sure, that the comments are proper English and understandable.

I am also wondering about who is actually writing the comments. The last sentence starts with " On paper we talk about the Polar Vortex ...". However, I do not see the name Pettini in the authors list.

I also wrote several emails to the email address (fabrizio.pettini@alice.it) you supplied, without ever getting an answer. You were also named a potential reviewer by the authors. Please clarify your relations to the authors of the paper.

Kind regards Mathias Palm
