Received and published: 22 April 2015

Dear Referee.

Thank you for your precious comments and for understanding merit of this manuscript. As your comments I discussed with my co-authors about it. I agree that this paper seems look like focus local aerosol measurement event.

Initially in this paper, we want to focus and to announce the depolarization characteristic of volcanic aerosol in stratosphere with time. However I think our description couldn't make it.

My co-authors and I decide what we will withdraw this paper after due reflection.

We will have more detail description and analysis for support our original purpose of this paper next time. Also we will consider seriously your comments. In near future, we will try to be a re-submit to ACP or other Journals.

Thank you again for your comments.

First author Dong Ho Shin.
