Dear Dr Han, I have carefully read the MS entitled "Heavy Air Pollution episodes in Beijing during January 2013: inorganic ion chemistry and source analysis using Highly Time-Resolved Measurements in an urban site" that you have submitted to ACP, as well as the reviewers comments.

Basing on my personal judgment and considering the reviewers comments I am afraid to say that I decided to reject the paper. The comments of the referees are very useful

C3019

and I think you must take advantage of them to draft a new MS.

Thanks for submitting your work to ACP.

Best Regards,

Carlo Barbante
