Interactive comment on “Comment on “Observation and modelling of HO_x radicals in a boreal forest” by Hens et al. (2014)” by D. Mogensen and M. Boy

J. Thornton (Referee)

thornton@atmos.washington.edu

Received and published: 27 January 2015

The comment should address additional previous studies of OH reactivity in forested regions, as pointed out by referee 1. Otherwise this comment is fair and to the point.
