Thank you for your short comment. We agree the paper is relatively light in terms of details regarding the comparison to the MODIS fire products, and the analysis of trends in fire activity. This is primarily because these are topics that are mainly dealt with in the companion paper which is also currently under review: <http://atmos-chem-phys-discuss.net/15/15909/2015/acpd-15-15909-2015.html>

Nevertheless, we will at least make this clearer in the text when we submit out updated
