Interactive comment on “Atmospheric constraints on the methane emissions from the East Siberian Shelf” by A. Berchet et al.

A. Berchet et al.

antoine.berchet@empa.ch

Received and published: 12 November 2015

We acknowledge the time spent by Dr. Shakhova to read and comment our paper. Considering the size of her (short) comment (10 pages of very dense comments and questions, organized around three main topics), we propose answers at two levels (see PDF in supplementary material): a synthesis of the main points of our answers and a detailed point-by-point answer.

Please also note the supplement to this comment:
