## Interactive comment on "Kinetics of the gas-phase reactions of OH radicals with alkanes and cycloalkanes" by R. Atkinson

R. Cox (Editor)

rac26@cam.ac.uk

Received and published: 4 August 2003

This review is self contained and comprehensive within the scope of the title. It provides recommended data over a larger temperature range than previous atmospheric data reveiws and by using a 3-parameter expression for the rate coefficients, accuracy of the recommended data over the temperature range is improved.

I think this will provide a benchmark for future compilations and evaluations for atmospheric kinetics data
