

Interactive comment on “Evaporation of high speed sporadic meteors” by E. Murad and C. Roth

E. Murad and C. Roth

Received and published: 21 April 2004

p. 6724, line 24: should 10^{-16} *p.6725, line 1 : should be 10^{-15}*

We have addressed all the reviewer's comments and modified the manuscript accordingly. We added an acknowledgement to Referee 2 for his valuable comments about the mislabeling of the figures and references to a missing figure. My co-author and I are grateful to this referee for catching this error.

Regarding the effect of density on evaporation rate, We are doing an extensive study of this issue now and will publish the results at a later date when they completed.
