

## ***Interactive comment on “SCIAMACHY validation by aircraft remote measurements: design, execution, and first results of the SCIA-VALUE mission” by A. Fix et al.***

### **Anonymous Referee #1**

Received and published: 3 February 2005

general comments: good description and discussion on an air borne system to validate SCIAMACHY measurements - nevertheless intercomparison results to SCIAMACHY data are missing

specific comment: change the title of the paper to reflect more explicitly the fact that real validation results are not included (e.g. "Description/Discussion of an air borne system to validate SCIAMACHY measurements")

Interactive comment on Atmos. Chem. Phys. Discuss., 4, 8381, 2004.
