

***Interactive comment on “The UV-A and visible solar irradiance spectrum: inter-comparison of absolutely calibrated, spectrally medium-resolution solar irradiance spectra from balloon- and satellite-borne measurements” by W. Gurlit et al.***

**Anonymous Referee #2**

Received and published: 15 February 2005

I have in fact gone through the paper again and have no real additional comments to make. I find the paper quite good and useful.
