

Interactive comment on “A Lagrangian Stochastic Model for the concentration fluctuations” by L. Mortarini and E. Ferrero

L. Frohn (Editor)

lmf@dmu.dk

Received and published: 11 August 2005

Only one interactive comment by anonymous referee #1 and one interactive response from the authors have been published for this particular paper. What cannot be seen on this web site is that the access peer-review included reports from two anonymous referees. The review from anonymous referee #2 was quite elaborate, more than what would be expected from a referee quick report. It is not evident from the interactive discussion web site, but the authors have in fact revised their manuscript according to the suggestions made by referee #2 before submission of the manuscript for ACPD. It would of course have been best if anonymous referee #2 had also found time to publish an interactive comment, however it is in my opinion not crucial and the review for the
