

## ***Interactive comment on “Impact of mixing and chemical change on ozone-tracer relations in the polar vortex” by R. Müller et al.***

**R. Müller et al.**

Received and published: 2 November 2005

We thank the reviewer for his comments. We have added a discussion on the use of curved tracer-tracer relations (such as CFC-11/N<sub>2</sub>O), a point raised in the review, to the paper.
