

***Interactive comment on*** “Robust relations  
between CCN and the vertical evolution of cloud  
drop size distribution in deep convective clouds”  
**by E. Freud et al.**

**Anonymous Referee #2**

Received and published: 13 December 2005

This paper presents a study of the relations between different below-cloud and in-cloud microphysical parameters in convective clouds. The relations have been carefully studied, the paper is well written, and the results are interesting. Once the instrumentation questions raised by referee #3 have been satisfactorily answered, the paper will be publishable in ACP.
