

Interactive comment on “A reconstruction of the past trend of atmospheric CO based on firn air samples from Berkner Island, Antarctica” by S. S. Assonov et al.

S. S. Assonov et al.

Received and published: 2 January 2006

We appreciate the comments made by the reviewer and agree with the technical comments. The curve in the lower part of the figure 11 gives the age distribution for the sample 58.88 m.
