

***Interactive comment on*** “Detection and  
measurement of total ozone from stellar spectra:  
**Paper 2. Historic data from 1935–1942” by  
R. E. M. Griffin**

**R. E. M. Griffin**

Received and published: 23 January 2006

The reviewer has helpfully suggested a database of which I was not at first aware, and although its quality is quite inferior to the Arosa one I will incorporate a reference and a new graphic in the revision. I have in fact been communicating directly with the reviewer, who is already known to me.
