

Interactive comment on “An improved inlet for precisely measuring the atmospheric Ar/N₂ ratio” by T. W. Blaine et al.

T. W. Blaine et al.

Received and published: 2 February 2006

Thank you for your comments. We will correct the language on the per meg unit. We will change the phrasing of the discussion on the meaning of per meg units; as the reviewer rightfully surmised, we do allow for the change in the total number of molecules. We did not include the Sturm paper in our reference, as it was only published about the time this paper was submitted, but we will be happy to include it in the revisions. Thanks for the technical corrections - we will correct these in the final version.
