

Interactive comment on “Ambient formaldehyde measurements made at a remote marine boundary layer site during the NAMBLEX campaign – a comparison of data from chromatographic and modified Hantzsch techniques” by T. J. Still et al.

T. J. Still et al.

Received and published: 12 June 2006

1) Intercomparisons and possible artefacts - More detail has been put into section 2.4 regarding the intercomparison experiments and 3.1 has been significantly revised to take on board both referees comments on possible sampling, calibration and measurement artefacts.

2) 12551 - We are grateful to the referee for pointing out this inconsistency. We have updated the discussion (section 5.0) including reference to the recent work under the FORMAT programme by Hak et al.
