

***Interactive comment on* “Evaluated kinetic and photochemical data for atmospheric chemistry: Volume III – reactions of inorganic halogens” by R. Atkinson et al.**

Anonymous Referee #2

Received and published: 29 May 2006

I have no specific comments but the following ones :

I went through this manuscript and I want to congratulate the authors for this kind of very valuable evaluation ! There is no doubt that this will be a basic tool for our community. It is to be noted that there are very few new data for these XO species which appeared, roughly during the last decade. Besides, I may point out that, in the introduction the authors could also refer to another evaluation, which has been also a reference paper for at least the european community (which was also published under the auspices of the EU). This paper was a special issue of Atmospheric Environment :

R.P. WAYNE, G. POULET, P. BIGGS, J.P. BURROWS, R.A. COX, P.J. CRUTZEN,

G.D. HAYMAN, M.E. JENKIN, G. LE BRAS, G.K. MOORTGAT, U. PLATT et R.N. SCHINDLER.

"Halogen oxides : radicals, sources and reservoirs in the laboratory and in the atmosphere".

Atmos. Environment. (1995) 29, 2675.
