

Interactive comment on “On the parameterization of turbulent fluxes over the tropical Eastern Pacific” by G. B. Raga and S. Abarca

G. B. Raga and S. Abarca

Received and published: 16 October 2006

The new version of the paper includes more discussion on the range validity of the proposed formulas to estimate the turbulent fluxes. Since we do not have other datasets available for comparisons, we have chosen to compare our data against parametrizations already in use by the community.
