Referee 2

The authors would like to thank the reviewer for the comments made regarding this paper. The comments have subsequently led to improvements in the revised version of this paper.

General Comment:

We would like to reassure the referee that we have adopted many of the suggestions made by the other reviewers in order to improve this paper. In particular, the scope of the paper has been clarified to highlight that we are looking at this event from a meteorological and dynamical perspective, rather than performing a full chemical analysis.

Specific Point:

The final plot in Figure 6 is indeed incorrect. Thank you for spotting this! The correction
