

Interactive comment on “Aircraft measurements over Europe of an air pollution plume from Southeast Asia – aerosol and chemical characterization” by A. Stohl et al.

A. Stohl et al.

Received and published: 7 January 2007

Given that the other reviewer has also suggested removing Figure 1 and shortening the text, we have re-considered this. We have removed Figure 1 from the revised version and have also significantly shortened the text. See also our comment to the other reviewer. After having done these changes, we are confident that the revised version of the paper is now indeed better than the longer ACPD version and would like to thank also this reviewer for her/his suggestion to shorten the paper.
