Interactive comment on “The Assimilation of Envisat data (ASSET) project” by W. A. Lahoz et al.

Anonymous Referee #2

Received and published: 1 February 2007

Thank you for the detailed answers and clarifications.

For point 10, inattentive reading on my part about $a - o$ for HALOE data could have been avoided by (for instance) using the keyword *validation* in the caption of fig. 10.

All improvements planned on the paper are more than satisfying.

Best regards
