Interactive Comment

Interactive comment on "Chemical characterization of the inorganic fraction of aerosols and mechanisms of the neutralization of atmospheric acidity in Athens, Greece" by E. T. Karageorgos et al.

R. Vautard (Editor)

robert.vautard@cea.fr

Received and published: 10 February 2007

The article relates the results of an exhaustive campaign of measurements of the chemical speciation of the fine particulate matter in the centre of a large mediterranean city.

Several points are raised by an anonymous reviewer. The authors are encouraged to provide a pointwise answer of the comments.
