

Interactive comment on “The global lightning-induced nitrogen oxides source” by U. Schumann and H. Huntrieser

U. Schumann and H. Huntrieser

Received and published: 14 April 2007

We thank the reviewer for the thoughtful and supportive comments. We have nothing to add to the content of these comments.

We are very grateful to the reviewer for his careful reading. The corrections suggested will be taken into account for proper revision.

We would like to note that since publication of our paper, several further studies have been published. Some of them will be included in the revised version.
