

Interactive comment on “Spectral absorption properties of atmospheric aerosols” by R. W. Bergstrom et al.

M. Collaud Coen

martine.collaud@meteoswiss.ch

Received and published: 6 August 2007

The publication of several AAE is very valuable. Before Meloni et al. (2006), the inversion of the wavelength dependence of the single scattering albedo in presence of mineral dust was already published in:

Collaud Coen M, E. Weingartner, D. Schaub, C. Hueglin, C. Corrigan, S. Henning, M. Schikowski, and U. Baltensperger, Saharan dust events at the Jungfraujoch: Detection by wavelength dependence of the single scattering albedo and first climatology analysis, Atmospheric Chemistry and Physics, 4, 2465-2480, 2004.

In this publication the AAE in presence of dust is also mentioned.
