

Interactive comment on “Record high peaks in PCB concentrations in the Arctic atmosphere due to long-range transport of biomass burning emissions” by S. Eckhardt et al.

S. Eckhardt et al.

Received and published: 13 August 2007

In figure 4 the orange color was used to indicate the samples of July 2004 and the green color for the samples of May 2006. This does not correspond with the other figures and was also described wrong in the legend. We therefore exchanged the orange and green color in figure 4.
