

Interactive comment on “Validation of the Atmospheric Chemistry Experiment (ACE) version 2.2 temperature using ground-based and space-borne measurements” by R. J. Sica et al.

R. J. Sica et al.

Received and published: 23 October 2007

We have made all your suggested changes, which have improved the manuscript. Thanks for your careful reading of the paper. We agree with you the term "Difference" is adequate, and have removed "absolute" and "relative". The error bias you pointed out we should state explicitly is indeed < 0.5 K (p12489, lines 14-15), and we have included that as you suggested.
