

Interactive comment on “Oceanic phytoplankton, atmospheric aerosol and Raman scattering impacts on space-based ultraviolet radiance measurements” by R.-M. Hu and R. S. Sokhi

R.-M. Hu and R. S. Sokhi

Received and published: 13 December 2007

Thanks for comments. We don't agree with M. Vountas's comment that some major issues are missing or confusing. Concerning about references in our paper, we think most important references have been cited. The other issues about reflectance, we suggest him to read our paper together with reference papers carefully in order to understand it well. We will give detailed response shortly.
