Interactive comment on “Factors influencing the large-scale distribution of Hg^o in the Mexico City area and over the North Pacific” by R. Talbot et al.

R. Talbot et al.

Received and published: 1 February 2008

Although it is difficult to use trajectories to identify sources, we ran several FSU kinematic backward trajectories and carefully looked at the flight path. Our conclusion is that we probably did not sample volcanic emissions. We added several sentences on p. 13 to address this point.
