The comments of the two reviewers would appear to be well taken.

The editor would appreciate the authors particularly bringing attention to the comments concerning the Figures, including better legend (Figure 2) and Figure 7 comments on colors to clarify presentation.

Also, I would assume that the Acknowledgement should give credit to all of the MILAGRO supporting agencies and mention should be made of the Mexican Science support.

The paper clearly deserves to be published with the minor revisions taken care of from the two reviewers comments.
