

Interactive comment on “Spatial heterogeneity of satellite derived land surface parameters and energy flux densities for LITFASS-area” by A. Tittebrand and F. H. Berger

A. Tittebrand and F. H. Berger

Received and published: 13 January 2009

Thank you for your complaisant comment. Concerning your remarks: All individual suggestions and remarks had been considered carefully. It was a good idea to start with the objective of the study and describe the investigations afterwards. I changed it in this way. Due to previous remarks of the reviewers to describe methods and results more exactly and in detail, I decided to shorten the text only in some parts.
