Received and published: 23 January 2009

The manuscript Update on emissions and environmental impacts from the international fleet of ships. The contribution from major ship types and ports by S. B. Dalsøren, M. S. Eide, J. Endresen, A. Mjelde, G. Gravir, and I. S. A. Isaksen has been evaluated by one anonymous referee and a short comment published by Volker Matthias. Thanks go to both referees !

Both referees favor publication of the manuscript after completion of the discussion phase however, major points have been raised especially in the very detailed short comment. Major points of concern are in particular: - please make clear where the

major scientific improvements are in comparison with earlier works - please make clear if the title of the manuscript is appropriate considering the points of criticism made by V. Matthias - please consider referees comments point by point and refer to them individually when preparing a revised manuscript
