I would like to make the authors aware of a new article relevant to their study. The AS/GA measurements in the following paper are comparable to those in the current study. Ling, T. Y., and C. K. Chan (2008), Partial crystallization and deliquescence of particles containing ammonium sulfate and dicarboxylic acids, *J. Geophys. Res.*, doi:10.1029/2008JD009779, in press (available via the 'Papers in press' link at <http://www.agu.org/journals/jd/>).
