***Interactive comment on* “Global ozone and air quality: a multi-model assessment of risks to human health and crops” by K. Ellingsen et al.**

K. Ellingsen et al.

Received and published: 30 April 2008

On behalf of the first author and all co-authors, the corresponding author would like to thank the reviewers for their detailed and very helpful comments. Due to the large amount of data and large number of co-authors involved (but also the relatively substantial revisions that have been asked for) it is going to take more than 4 weeks time to address all the issues. We kindly ask the reviewers and the editor for their understanding. With best regards, Michael Gauss (corresponding author)
