

Interactive comment on “Aerosol direct radiative effect in the Po Valley region derived from AERONET measurements” by M. Clerici and F. Mélin

K. Carslaw (Editor)

CARSLAW@ENV.LEEDS.AC.UK

Received and published: 9 May 2008

This is a thorough paper on an important topic. It appears to be technically accurate and well presented. The single referee has raised some issues that have been addressed by the authors in their reply. Overall, I see no need to press for the second review in this case.
