## ***Interactive comment on “Iodine speciation in rain, snow and aerosols and possible transfer of organically bound iodine species from aerosol to droplet phases” by B. S. Gilfedder et al.***

**B. S. Gilfedder et al.**

Received and published: 9 May 2008

I recently realized that figure 7 is incorrect, as in the final stages of production an old copy of this figure was erroneously submitted to the formatting office. The correct figure can be obtained from the first author, and will be entered into the final version of the manuscript. I apologize for any inconvenience this may have caused.
