

## ***Interactive comment on “Reconstruction of the solar spectral UV irradiance for nowcasting of the middle atmosphere state on the basis of LYRA measurements” by T. Egorova et al.***

**T. Egorova et al.**

Received and published: 14 May 2008

We would like to thank N. Krivova and one anonymous reviewer for their helpful comments. All revisions and suggestions have been introduced to the revised version of the manuscript. In the future work we will consider the application of the PS and MG-II indexes as additional proxies for the reconstruction of the spectral solar irradiance. We have also improved the quality of the figures.
