**Dear authors, Thank you for the excellent study on  
Brewer and FTIR techniques! I have just a minor  
comment: it might be useful if you add a small  
paragraph or subsection at the begin of your  
article where you explain what you mean with  
'precision' and 'accuracy' and how these terms**

are related to standard deviation, error of the mean, random and systematic error. For example, I noticed that some studies use 'precision' for 'standard deviation', and other studies use it for 'error of the mean'. It would be good if you could provide a brief tutorial on this important topic.
