Interactive comment on “Simulation of dust aerosol and its regional feedbacks over East Asia using a regional climate model” by D. F. Zhang et al.

D. F. Zhang et al.

Received and published: 13 November 2008

On behalf of the co-authors I would like to thank all of you. We appreciate all of your productive comments. As matter of fact, most of the referrers comments are well taken. We took the referrers comments into our considerations and we addressed them into the revised version of our paper. Our response on the referrers comments will be posted with the revised version of the paper to ACP.
