Thanks for pointing out additional references for the Meso-NH model by Tulet et al. (1999; 2003). All three Tulet et al. papers have been added in p1842 where other European models were cited in my revised version.

Note that the paragraph in p1840 in section 2.1 is the review section for models at all scales, not just the global models. This is followed by two separate paragraphs of a brief review on global models and urban/regional models in p1841 and p1842, respectively. So, the original location of the citation for Tulet et al. (2005) in line 29, p1840 is correct.
