Interactive Comment

## Interactive comment on "A comparison of water uptake by aerosols using two thermodynamic models" by L. Xu et al.

## S. Metzger

metzger@mpch-mainz.mpg.de

Received and published: 12 June 2009

We also thank Dr Philippe Marbaix (and the whole group of Prof Jean-Pascal van Ypersele) for the interest and time to investigate EQSAM3, and the interactive comment(s) on "A comparison of water uptake by aerosols using two thermodynamic models" by L. Xu et al.,

However, we wonder about the fact that these interactive comments have been published just one day before, and this one even after the deadline. To foster scientific discussion, which we highly support, an earlier response would have been more appropriate in order to allow other interested scientists to reply in time with their comments.
