We refer to our reply to some critical remarks by R. Lescroart et al. and apologize for the late submission of the reply. We needed the time for an additional model inter-comparison with the reputed models ISORROPIA2 (http://nenes.eas.gatech.edu/ISORROPIA/) and E-AIM, the latter generally regarded as a reference model (http://www.aim.env.uea.ac.uk/aim/aim.php) those results are shown in our reply to R. Lescroart; the figures are bundled in the supplement (acpd-9-C3233-2009-supplement).

C3246

Furthermore, we have asked for another extension of the Interactive Discussion period to allow for further comments and discussion of these additional results in case necessary.
