

Interactive comment on “Lagrangian mixing in an axisymmetric hurricane model” by B. Rutherford et al.

Anonymous Referee #2

Received and published: 3 November 2009

The last sentence of the first paragraph of this comment should read as

"As these methods are still relatively new (less than 2 decades) and their application to study the problem of HURRICANE mixing seems novel to this reviewer, there is definite scientific merit in this paper."

The word "hurricane" was missing.
