

Interactive comment on “Origin and transport of Mediterranean moisture and air” by I. Schicker et al.

Anonymous Referee #1

Received and published: 27 November 2009

Some clarifications with regard to Figs. 10 and 12 are needed before I can complete the review:

In Fig. 10 the caption does not agree with the labeling of the figure panels, are left/right forward/backward or troposphere/boundary layer?

In Fig. 12 the forward and backward panel appear exactly identical, can you double check that this figure is correct?

There is a discussion of 30-day residence times on pg. 21439 line 16 onward, but the corresponding figure is not included in the paper

Please post a reply on this asap
